

PROFILE  
EGEO

### **Our raison d'être is Innovation**

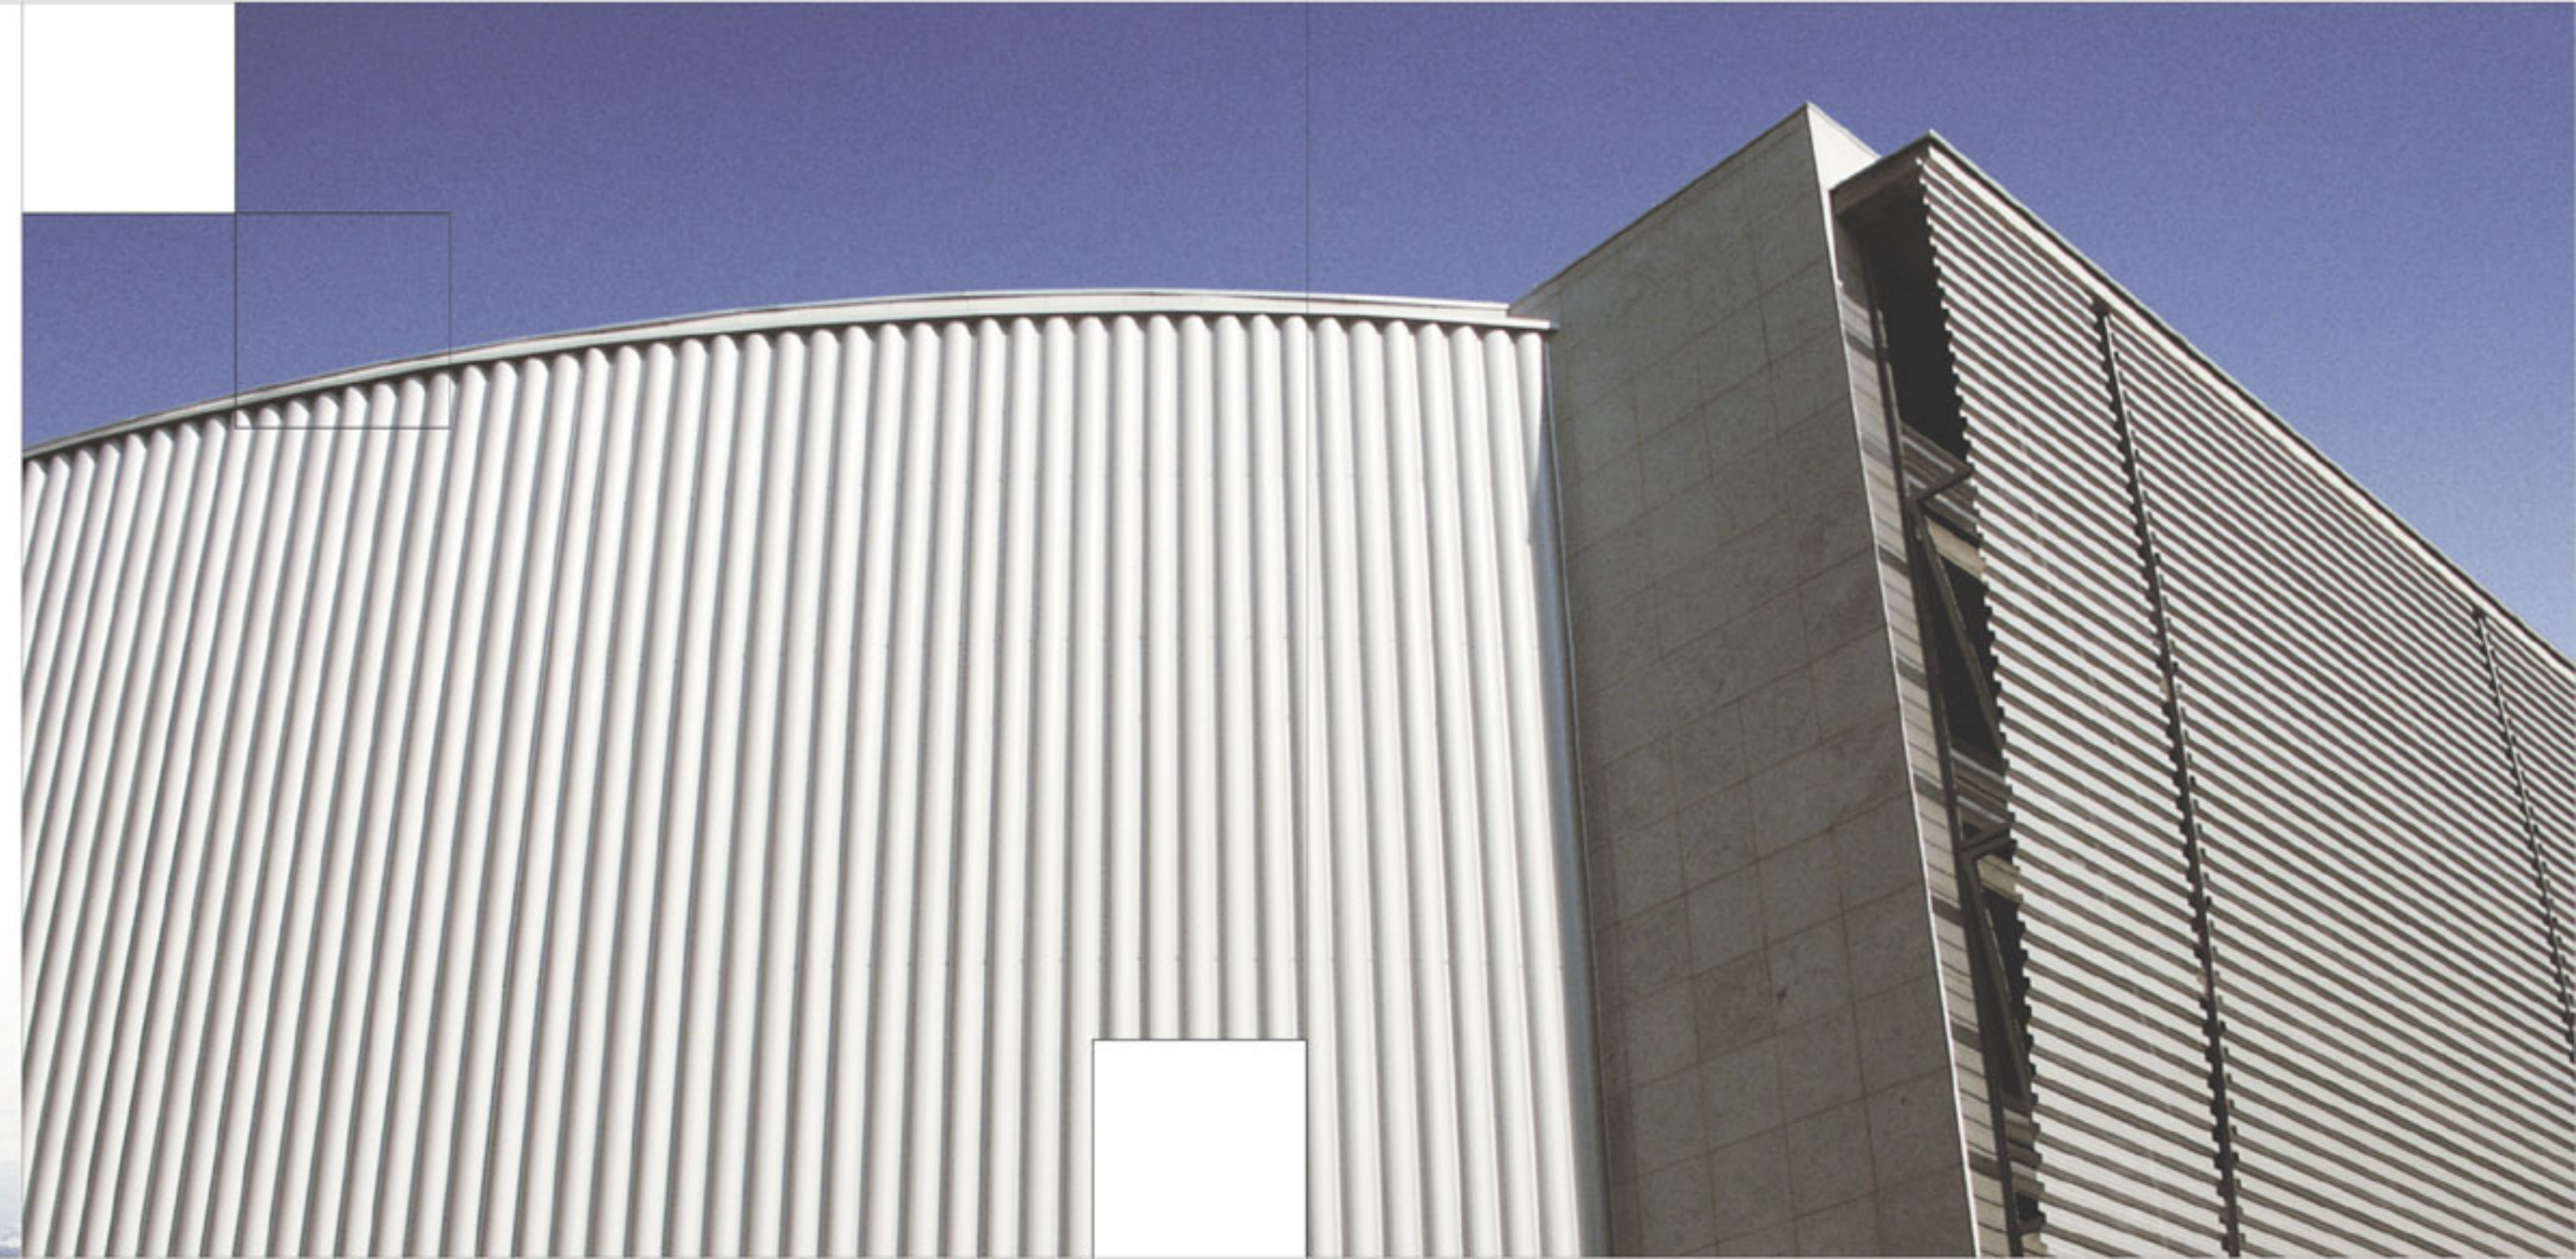

EGEO is our latest creation. A new, unique design for architectural façades. An extraordinary alternative for all kinds of buildings where a strong emphasis on aesthetics is required.

The difference with the EGEO profile is its polygonal cross-section which creates a gradation of tonalities on the façade that change with the orientation of sunlight.

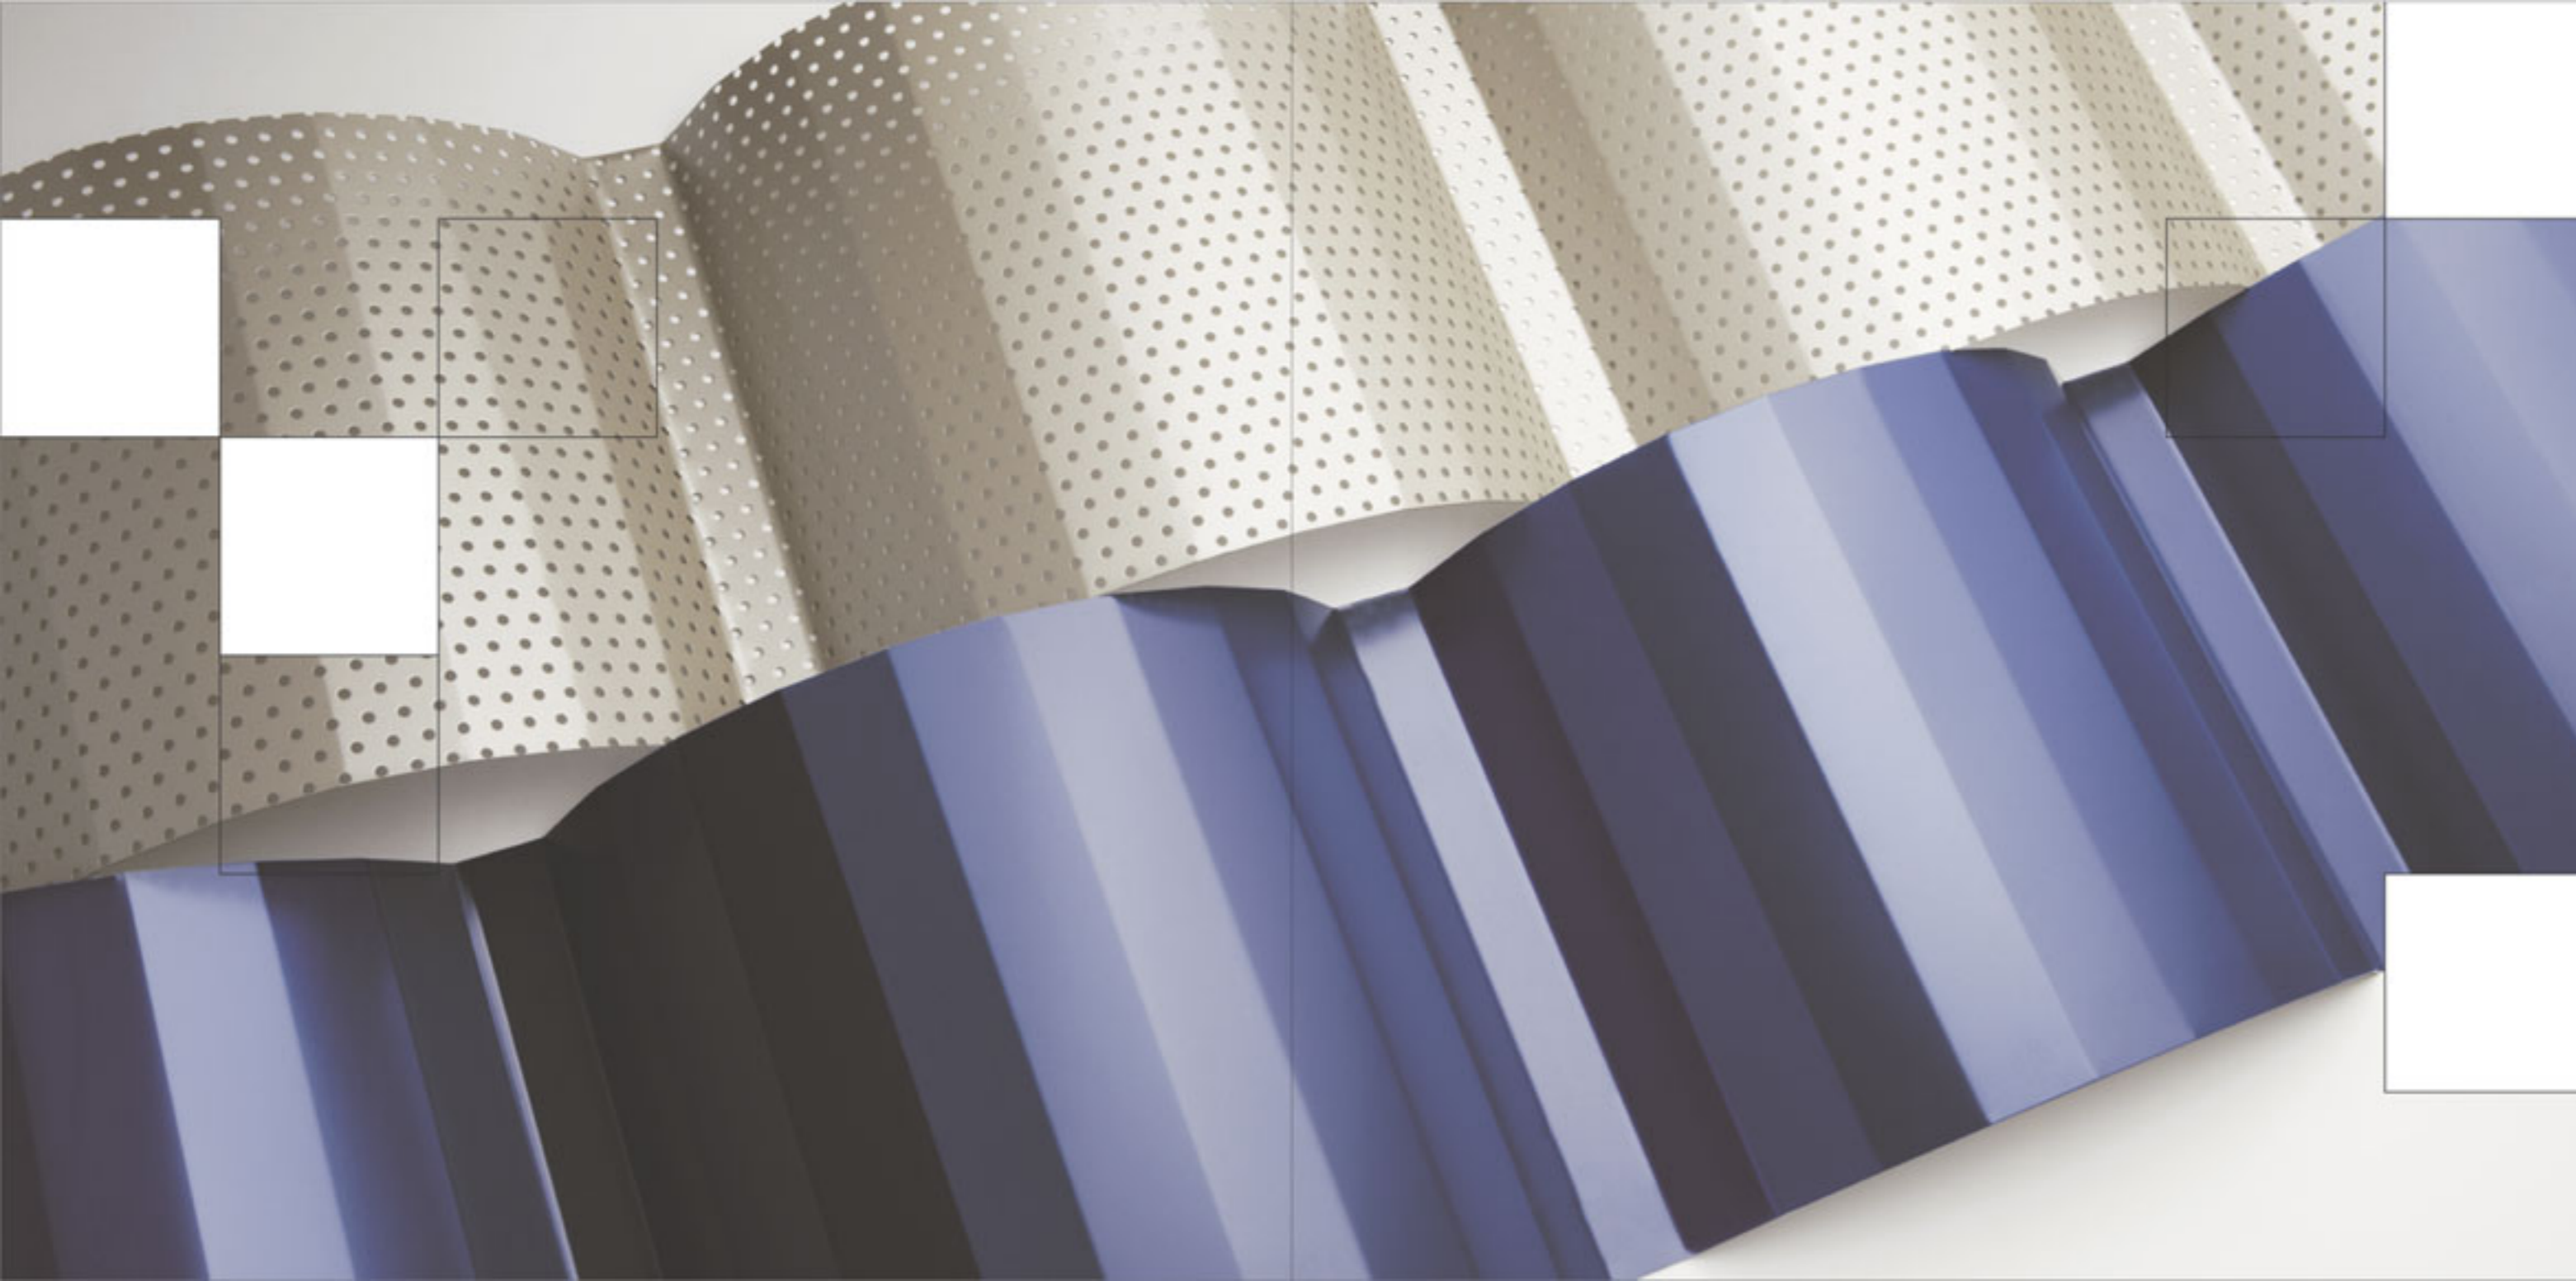

Do not try to imagine it, contact us and we will

# EGEO

The way forward to a new kind of architecture
